Florida State University

²School for Computational Science
Florida State University

SIAM Conference, 2004

Outline of Topics

① Lists

② Graphics

③ Hyperlinks

"Dynamic" Lists

With a few extra marks, you can have Beamer march through each item on a list one at a time.

A Sample List

- Normal LaTeX class.

A Sample List

- Normal LaTeX class.
- Easy overlays.

A Sample List

- Normal LaTeX class.
- Easy overlays.
- No external programs needed.

Including Graphics

Most graphics files can be converted to **.png** format. Such files are then easily included in your presentation.

PNG Graphics

A graphics file is included by using the **figure** environment, and inside of that the **includegraphics** command.

PNG Graphics

The previous graphic had a background that almost matched the slide. A more typical case is shown here. The graphics figure simply shows up as a rectangle imposed on the slide.

Want More Information?

For more information on the Beamer Class, click on **the Beamer web site**.
